

PEAK LIGHT LUPE 10X

The Peak Lupe Series, now well accepted for its excellent magnifying power both at the workshop and in the home, has recently been expanded with a new addition—Peak Light Lupe 10X.

The Peak Light Lupe 10X is an improved model of the Peak Lupe 10X, an excellent magnifier which is widely used because of its magnifications, field of vision and reasonable price. The new unit features a built-in lighting device that works from a pair of UM-2, 1.5-volts batteries. Powerful, convenient and lightweight, the flashlight is made of metal and the crystal-clear lens is shielded by a hard plastic holder.

With its excellent performance and smart appearance, the Peak Light Lupe 10X is a complete solution to the trouble often met in using a conventional magnifier in a dim place. Of course, since the new unit absorbs a sufficient amount of light, it needs not depend on the lamp in a bright place.

Magnification:	10X
Size:	36 ϕ × 41 × 175 mm
Net weight:	81 gm.
Battery:	UM-2 (1.5V) × 2
