REACH SVHC Compliance

On June 2007, compliance with the European Union Regulation (EC) 1907/2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) was required. This Regulation establishes specific duties and obligations on companies in the European Union (EU) that manufacture or import substances on their own, in preparations, or in articles.

As defined in the REACH Regulation, FLIR Integrated Imaging Solutions, Inc. is a manufacturer and supplier of **articles** to our EU customers. We do not manufacture or supply substances or preparations. Also, our articles do not involve the intentional release of substances. Accordingly, no registration or pre-registration is required for the products we supply to our EU customers.

FLIR Integrated Imaging Solutions is constantly monitoring the substances of very high concern (SVHCs), as defined by REACH, in our products. This is an on-going process because the list of SVHCs is currently updated approximately every 6 months.

Customers are encouraged to visit the following site to get the most up to date information on the current list of SVHCs under REACH:

<https://echa.europa.eu/candidate-list-table>

If you require a REACH declaration for a specific product, please contact FLIR Integrated Imaging Solutions.
